THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remains a present form. changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galvanic Cement, has labored twenty years to combine articles to obviate those difficulties, and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best aticler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; liming eave-troughs, seaming around battlements, chimneys and sky-lights. Covering car-tops, steamer-decks, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever invented, for entire roofs or for covering metal and the out side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humbles cottage.

The undersigned having secured the right to the State of umble cottage.

The undersigned having secured the right to the State of rennessee, will sell rights of Territory, by Counties or Tennessee, will sell rights of Territory, by Counties or Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This Roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of Roofing. The subscriber has lad his mode of Roofing tested as to its qualities, during the latt year and a half in the city of Memphis, which has proved satis actory, to which a number of the nost prominent citizens can testify. testify.

W. S. BENNETT, Proprieto. Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactry to all.

MEMPHIS, March 12, 1857.

MR. W. S. BENNETT.—When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability. &c., of West's Patent Roof, such as you are using in the city of Memphis. Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advo cates claim it to be; farther saying that he is using it on a fine building for himself. Respectfully.

To WHOM IT MAY CONCERN.—This is to certify that W. 8 Bennett covered two roofs for me last spring, with a com-position called West's Patent Galvanic Cement one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dor-mer window, which leaked badly, and had balled the skill of Carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recom

Yours, &c., H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857. To the Public.—W. S. Bennett, made application to us ast summer to cover our buildings with West's Galvanic Cement; it being a new thing, we thought we would try it had it applied to our Black-mith Shop, and Engine House attached to the Foundry. They have proved all required of a water proof roof, having withstood some of the great-est storms, and are giving good natisfaction. We can only add, try it and you will be satisfied. PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING

THE undersigned is prepared to introduce into use in Tennessee w. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Duthers, Railroad Companies, and the public to examine its superiority over other Pecchine. Roofing.

ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the atm phere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question. It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good sheathing, old shingles, tar and gravel, tin, zinc, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it will give better satisfaction.

It will also be found to be the best thing ever invented to

over or mend old leaky tin, tarand gravelroofs, or around chimneys, scuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best theng for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad fir —such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint n it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

The Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Buildings with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin.

The Cement will be furnished to those at a distance with directions for using.

Orders sent to the undersigned, through the Post-

office, will be promptly attended to I would respectfully refer to the following gentlemon for whom I have covered buildings with the cement. ARCHITECTS AND MASTER MECHANICS OF MASHVILLE. Mr. H. M. AKEROYD. Maj. A. HEIMAN. Messrs. J. A. HUGHES & SMITH. WARREN & MOORE,
